PRINTS FOR COFFER FRAMES

DECORS

- polyester material with basis weight of 210 or 220 g/m² and limited translucency
- the possibility of making printouts of almost any length, with a maximum width of 310 cm
- printing with the use of direct dye-sublimation technology
- printout trimmed with PVC keder 14 x 3 mm (or other as per order)
- intended for one-sided coffer frames
- decors adapted to coffer frames of various structures

BLOCKOUT

- maximum graphic width in one piece: 300 cm
- material: polyester with non-flammability certificate
- black-coloured reverse side of the material to block light
- printing with the use of direct dye-sublimation technology
- printout trimmed with PVC keder 14 x 3 mm (or other as per order)
- intended for one- and two-sided coffer frames
- used frequently as a trade fair stand component

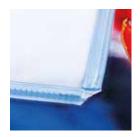

- (or other as per order)

BACKLIGHTS material dedicated to backlighting printing with the use of direct dye-sublimation technology printout trimmed with PVC keder 14 x 3 mm

COFFER FRAMES

- made of aluminum profile
- one- or two-sided
- self-standing (with stabilising feet) and suspended
- with (LED lamps) and without backlighting

PVC keder to facilitate installation

A sewn-in loop facilitates artwork replacement

Packed printout saves space

SELECTED PROPERTIES OF COFFER FRAMES

125 mm aluminium section

Stabilising feet

LED lighting

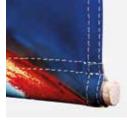

INDOOR **BANNERS**

- available in different sizes
- rolled up, lightweight, easy to transport
- high-quality printouts on a wide range of materials
- typical finishing methods:
 - top, bottom: tunnels + two round stiffening battens
 - rope to hang the banner
 - sides: double stitching
- the battens eliminate flapping in moderate puffs of wind indoors

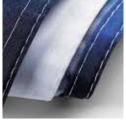

FINISH

Double stitch

Banner top

Banner bottom

STAGE **AND EVENT ARRANGEMENTS**

- the possibility of making very large projects by making them from pieces, e.g. stage and trade fair decors, sports stadium flags, theatrical and television sets, and artwork arrangements for mass events
- printing in direct sublimation technology (up to a width of about 3.2 m in one piece) and in UV technology (up to about 5 m in one piece)
- printing on many different materials is possible
- finishing method as per customer's individual order

TEXTILE BANNERS

- available in any sizes
- printouts on polyester material of flag or banner type
- printed with the use of direct dye-sublimation technology
- various finish options available:
 - cut to size
 - edges reinforced with polyester band + eyelets
 - tunnel
 - trimmed edge
 - trim + string and loops in corners
- depending on finish type, banners may be used in different applications, e.g. as a pitch-board flag
- used typically in settings of mass events

Tunnel

Cut to size

NON WOVEN FABRIC BANNERS

- non woven fabric 130 g/m²
- lightweight reinforced fabric
- direct dye-sublimation printing technology
- cutting to size and eyelets each 100 cm in standard
- very lightweight many meters long printed rolls can be made to order
- to be used e.g. as an excellent element of mass event settings / advertising pitch sideboards

Lightweight reinforced fabric

Cutting to size and providing eyelets in standard

THE OFFER

DOES NOT INCLUDE FRAMING

BARRIER COVERS

- dimensions adapted to barrier dimensions
- printed on fabrics with basis weight of 210 or 220 g/m²
- printing with the use of direct dye-sublimation technology
- to be used during mass events

ADVANTAGES

Easy to install – fixed with velcro straps

PROMOTIONAL FLOOR MATS

- polyester material with non-slip backing
- sublimation printing
- floor mat thickness: 2,8 mm
- used as an advertising medium or for interior decoration

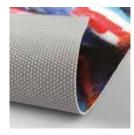

ADVANTAGES

Roll floor mat

Thickness 2,8 mm

Non-slip backing

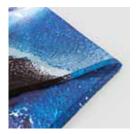

BEACH FLAGS

- STANDARD 110 g/m² polyester material, tunnel sewn of black elastic band
- PREMIUM made entirely of 110 g/m² polyester material, including tunnel
- TWO-SIDED made of two layers of 110 g/m² polyester fabric and see-through blocking spacer allowing to expose different artwork on each side of the beach flag
- **RECTANGULAR** made entirely of 110 g/m² polyester material, including tunnel
- typically, made in four shapes (TYPE 1, 2, 3, H) and four sizes (page 8)
- material with non-flammability certificate
- artwork very well visible on reverse side - one-sided beachflag
- printing with the use of direct dye-sublimation technology
- tunnel reinforces at both winder ends
- mast of glass fibre and aluminium
- available also in other shapes (as per the customer's template)

Artwork very well visible on reverse side - PREMIUM, STANDARD beachflags

FINISH OPTIONS

Reinforced tunnel with loop to make installation easier

Rubber band tunnel – STANDARD beachflag

Printed tunnel - PREMIUM beachflag

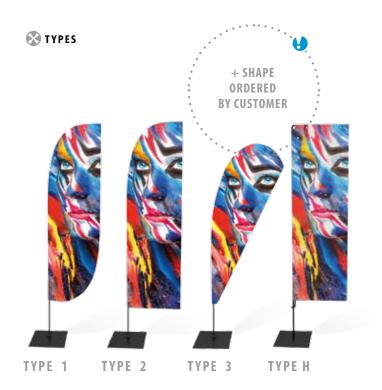

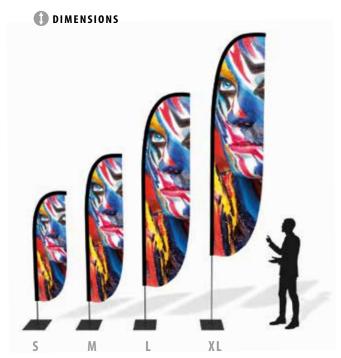

Edges trimmed with double

STANDARD PREMIUM

MASTS

Made of glass fibre and aluminium.

FLAT BASE

Flat base with rotator, also for outdoor use where additional load in the form of soft water-filled base is recommended; for sizes: S, M, L, XL

BASE: 40 x 40 x 0,42 cm; weight: 5,7 kg BASE: 40 x 40 x 0,8 cm; weight: 10 kg

DRIVE-IN BASE

Drive-in base used for hard substrates such as tamped down soil, 60 cm; for sizes: S, M, L, XL, weight: 1,7 kg

SOFT WATER-FILLED BASE

Soft base filled with water up to 10 L, to provide additional load weight for flat and cruciform bases of size: S, M, L, XL; weight: 0,15 kg

SCREW-IN BASE

A base to be screwed into loose substrates such as sand or snow (total length 50 cm, screw length 24 cm); for sizes: S, M, L, XL; weight: 0,8 kg

BAG FOR FLAT BASE

Bag for flat base to make transport easier; dimensions: 40 x 40 cm; weight: 0,2 kg

SMALL CRUCIFORM BASE

Lightweight cruciform base 70 cm, powder-painted, used for compact substrates; for size: S, weight: 1,8 kg

BAG FOR BEACHFLAG

A convenient bag for safe transport of masts together with flags and cruciform, and drive-in;

BAG FOR S, M BEACHFLAG

dimensions: 100 x 20 cm; weight: 0,4 kg **BAG FOR L, XL BEACHFLAG**

dimensions: 124 x 22 cm; weight: 0,52 kg **BAG FOR DOUBLE-SIDED BEACHFLAG** dimensions: 155 x 20 cm; weight: 0,82 kg

LARGE CRUCIFORM BASE

Large cruciform base with rotator 90 cm, the cross powder-painted black, also for outdoor use where additional load in the form of soft water-filled base is recommended; for sizes: S, M, L, XL; weight: 7 kg

ADVERTISING FLAGS

- SINGLE-SIDED FLAGS artwork very well visible on reverse side
- TWO-SIDED FLAGS (different artwork on each side)
- the possibility of making almost any flag size
- printed on polyester material with basis weight of 110 g/m²
- printing with the use of direct dye-sublimation technology
- edge finish adapted to mast type
 - with or without arm

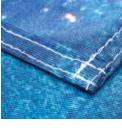

- top: tunnel for masts with arm or double-stitch trim for masts without arm
- bottom and right side: double-stitch trim
- left side: flag band + carabiners
- other finishing methods are available as per customer's order

ADVANTAGES

Tunnel

Edge finished with double-stitch trim

Edge with carabiners reinforced by flag band

TENTS

- made of polyester material
- water resistance
- the possibility of any personalization
- available in many versions (with side walls)
- easy assembly
- the possibility of valuation of individual elements the roof / walls alone

FRONTLIT BANNERS

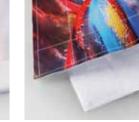

- available in any size and different finish options
- maximum graphic width in one piece: 500 cm
- weldable material allows to produce large-area advertising surfaces
- available with basis weight of 450 g/m² and 510 g/m²
- allows to obtain high-quality UV printouts
- dedicated for short- and medium-lived applications
- typical finishing methods:
 - cut to size
 - welded around + eyelets every 50 cm
 - welded tunnel
 - sewn-on round keder
 - sewn-in velcro straps
- other finish options available as per customer's order

TYPICAL FINISHING OPTIONS

METHODS ARE AVAILABLE AS PER CUSTOMER'S

INSTALLED **TYPICALLY**

Weld + eyelets

Sewn-on round keder

Sewn-in velcro straps

Welded tunnel

MESH BANNERS

- available in any size
- maximum graphic width in one piece: 500 cm
- material: mesh-structured PVC fabric of durable fibres
- available in standard (280 g/m²) and premium (340 g/m²) versions
- much lighter than frontlit or backlit type textiles
- enables free flow-through of air and light
- perfect as a carrier for large ads installed on building façades
- typical finishing methods:
 - cut to size
 - welded around + eyelets every 50 cm
 - welded tunnel
 - sewn-on round keder

Welded tunnel

Sewn-on round keder

BLOCKOUT BANNERS

- available in different sizes and finish options
- weldable material allows to obtain large advertising surfaces; maximum graphic width in one piece: 320 cm
- a coated material with a spacer inside preventing the artwork from being seen from reverse side
- thanks to inner separator, banners do not show through even on sunny days and are perfectly readable
- particularly suitable for two-sided printing
- allows to obtain high-quality printouts characterised with high resistance to tearing and fraying
- can be used both indoors and outdoors

TYPICAL FINISHING OPTIONS

Cut to the size

Weld + eyelets

Welded tunnel

Sewn-on round keder

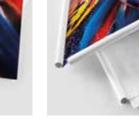

BACKLIGHT BANNERS

- a coated matt-finished material characterised with excellent light diffusion and transmission properties
- two-sided UV technology printing (with vertical mirror image on reverse side)
- maximum graphic width in one piece: 495 cm
- the printout looks the same during the daytime (without backlighting) as at night-time ("day/night" feature)
- material very resistant to tear and wear, moisture, UV radiation, and both low and high temperatures
- intended mainly for framing

TYPICAL FINISHING OPTIONS

Sewn-on round keder

Cut to size

ROLL-UPS

- available in three sizes
- UV technology printing on material with basis weight of 240 g/m²
- fast and easy to install
- aluminium structure
- bag included

SPECIFICATION

Туре	System dimensions width x height x depth [cm]	Artwork dimensions width x height [cm]	Weight [kg]

100	101,5 x 208 x 32	100 x 210	2,5

ADVANTAGES

Printout on polyester material

Mast stabiliser

- UV printout on a 440 g/m² PVC material with black spacer
- artwork fixed with the use of simple eyelet system
- lightweight structure of glass fibre
- a structure of 4 crossing bars and a stabilising support
- lightweight and versatile mobile advertising system, fast and easy to install
- cover included

SPECIFICATION

Туре	System dimensions width x height x depth [cm]	Artwork dimensions width x height [cm]	Weight [kg]
X-BANER 80	85,5 x 195 x 95	80 x 180	1,4

ADVANTAGES

Eyelets for quick assembly

STUDIOKOLOT
LARGE FORMAT PRINTING COMPANY

BAG INCLUDED

PVC FLOORINGS

- material: polyester coated with foamed PVC, with thickness of 2.2 mm and basis weight of 1000 g/m²
- maximum graphic width in one piece: 313 cm
- UV technology printing
- soft and soundproof flooring is perfect as an advertising medium or for interior decoration
- resistant to stretching, tearing, and creasing

Cut to shape as per order

2.2 mm thick flooring

FLOOR STICKERS

- available in any size
- material: laminated monomer self-adhesive film
- durable material resistant to mechanical damage and aggressive detergents
- UV technology printing
- high quality printouts vivid colours
- very good adhesion to smooth surfaces

Any shape can be cut to order

Printout edges protected with laminate

Non-slip structure

AND OUTDOOR
APPLICATIONS

ANTI-SKID

CERTIFIED PRODUCT

UV BACKLIT FILM

- material: specifically coated 180 micron thick polyester film
- available in three widths: 106.7 cm, 127 cm, and 152.4 cm
- UV technology printing in double strike mode
- photo-quality printouts with extraordinary colour depth
- used mainly for indoor backlit ads
- finish:
 - cut to the size

WALLPAPERS

- many sizes available to order
- material: specifically coated Fleece with smooth structure and basis weight of 210 g/m²
- large artwork divided into pieces with maximum piece width of 104 cm
- excellent product, used both as decorative and ad-carrying material
- high quality UV technology printing vivid durable colours
- easy to put up with the use of wallpaper glue
- resistant to damage and soiling
- health-friendly
- standard finish: cut to size without laps

SELF-ADHESIVE FILMS

- the possibility to prepare an advertisement of any size and shape
- perfectly adapt to many types of surfaces
- UV technology printing
- depending on film type, printouts are intended for short-, medium-, and long-living indoor and outdoor applications
- perfectly suitable for sticking on shop windows, trade fair stands, exposition walls and advertising boards, as well as cars

TEXTILES FOR UV PRINTING

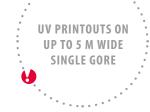

- available in different sizes
- materials: 100% polyester
- fire- and water-proof
- one-sided UV technology printing
- light-diffusing inextensible materials
- used mainly for fair stands, also in blockout version

Cut to the size

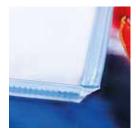

Sewn-on flat keder

Welded tunnel

TEXTILES FOR UV PRINTING FOR BACKLIT APPLICATIONS

- available in different sizes
- maximum graphic width in one piece: 500 cm (depends on finnishing)
- materials with a weight of 180 g/m²
- UV technology printing
- guarantee high quality of printed graphics
- they are impervious to air and water
- they let light through and disperse it well
- mainly used in illuminated advertising media such as lightboxes and coffer frames
- they can also be used in advertisements without backlighting
- used outdoors and indoors
- materials easy to assemble
- finishing: sewn-on flat keder 14 x 3 mm (or other according to the order)

Flat keder makes installation of the printout easy

A sewn-in loop facilitates makes replacement easier

Good light diffusion properties

FOAMED BOARDS

- available in different sizes and thickness
- as a standard, we use 3 mm and 5 mm thick boards
- the maximum board size is 203 cm x 305 cm
- artworks exceeding the board size are divided into pieces
- material: rigid polyvinyl chloride boards, white or coloured
- board surface is matt as a standard
- the material has a regular internal structure of closed cells and a smooth and hard surface
- UV technology printing
- enables high degree of colour reproduction
- material resistant to water and chemical agents, flash-resistant, soundproof
- wide range of applications in large-size advertising

FINISH

- cutting / milling to size or shape
- bending

ADVANTAGES

Milled board

Thermally bent

Two-sided print

TRANSPARENT BOARDS

- available in different sizes and thickness
- 2 mm thick boards in 205 cm x 305 cm size are a standard
- one of the materials most frequently used in advertising business
- resistant to harsh weather conditions and UV radiation
- characterised with good transparency and high rigidity
- UV technology printing
- as an option, printing of mirror image on reverse side is possible in two or three layers with the use of white ink
- wide range of wide-size advertising applications

Thermally bent board

Printed with the use of white ink

BOARDS ARE

CUT OR MILLED

DIBOND COMPOSITE BOARDS

- standard sizes: 305 x 150 cm, 405 x 150 cm, or 405 x 200 cm
- board thickness: 2 mm and 3 mm
- aluminium facing thickness: 0.2 mm or 0.3 mm
- material: rigid and aesthetic composite boards made of varnished aluminium layers bonded with low-density polyethylene (LD-PE) core
- UV technology printing
- versatile material for various applications
- the most durable and weather-resistant flat material
- resistant to delamination
- depending on manufacturer, available in different shades of white and other colours

FINISH

- milled to size or shape
- angled milling

ADVANTAGES

Angled milling

Optional bending after angled milling

- improves exposition of merchandise sold directly from pallets
- is an additional and inexpensive advertisement carrier

ADVANTAGES

PVC boards, polypropylene sheet, PALBOARD

Polypropylene - fixed with velcro straps

Bend and twisted PVC

Viking screws

Studio Kolor is a company operating in the printing and advertising industry since 1995. We specialise in visual communication, and more specifically in digital large format printing. We have provided support to our Customers in the area of retail marketing and event marketing. Owing to our advanced production lines - including an extensive sewing facility – operated by competent and experienced personnel, we can deliver even the largest and most complex orders. We supply a very wide range of products, based on sublimation printing or UV printing. We are well equipped to handle massive orders, including large quantities of standard products or single prints with a surface of a few thousand square metres. Our high quality performance and our commitment to deliver the best possible services have earned us the trust of our Business Partners time and again.

We are looking forward to doing business with You.
