WINDERS

- **STANDARD** – 110 g/m² polyester material, tunnel sewn of black elastic band
- **PREMIUM** – made entirely of 110 g/m² polyester material, including tunnel
- **TWO-SIDED** – made of two layers of 110 g/m² polyester fabric and see-through blocking interleaf allowing to expose different artwork on each side of the winder
- typically, made in three shapes (TYPE 1, 2, 3) and four sizes
- material with non-flammability certificate
- artwork very well visible on reverse side – one-sided winders
- printing with the use of direct dye-sublimation technology
- tunnel reinforces at both winder ends
- mast of glass fibre and aluminium
- available also in other shapes (as per the customer's blanking tool)

MERITS

Artwork very well visible on reverse side – PREMIUM, STANDARD winders

Reinforced tunnel with loop to make installation easier

Rubber band tunnel – STANDARD winder

Printed tunnel – PREMIUM winder

Edges trimmed with double stitch

ACCESSORIES

MASTS

Made of glass fibre and aluminium

DRIVE-IN BASE

Drive-in base used for hard substrates such as tamped down soil, 60 cm; for sizes: S, M, L, XL, weight: 1,7 kg

SCREW-IN BASE

A base to be screwed into loose substrates such as sand or snow (total length 50 cm, screw length 24 cm); for sizes: S, M, L, XL; weight: 0,8 kg

SMALL CRUCIFORM BASE

Lightweight cruciform base 70 cm, powder-painted, used for compact substrates; for size: S, weight: 1,8 kg

LARGE CRUCIFORM BASE

Large cruciform base with rotator 90 cm, the cross powder-painted black, also for outdoor use where additional load in the form of soft water-filled base is recommended; for sizes: S, M, L, XL; weight: 7 kg

FLAT BASE

Flat base with rotator, also for outdoor use where additional load in the form of soft water-filled base is recommended; for sizes: S, M, L, XL
BASE: 40 x 40 x 0,42 cm; weight: 5,7 kg
BASE: 40 x 40 x 0,8 cm; weight: 10 kg

SOFT WATER-FILLED BASE

Soft base filled with water up to 10 L, to provide additional load weight for flat and cruciform bases of size: S, M, L, XL; weight: 0,15 kg

BAG FOR FLAT BASE

Bag for flat base to make transport easier; dimensions: 40 x 40 cm; weight: 0,2 kg

BAG FOR M WINDERS

A convenient bag for safe transport of masts together with flags and cruciform, drive-in, and screw-in bases; dimensions: 93 x 23 x 3 cm; weight: 0,8 kg

BAG FOR S, L, XL WINDERS

A convenient bag for safe transport of masts together with flags and cruciform, drive-in, and screw-in bases; dimensions: 122 x 23 x 3 cm; weight: 0,9 kg

▶ ADVERTISING FLAGS

- **SINGLE-SIDED FLAGS** – artwork very well visible on reverse side
- **TWO-SIDED FLAGS** (different artwork on each side)
- flags of virtually any dimensions can be fabricated
- printed on polyester material with basis weight of 110 g/m²
- printing with the use of direct dye-sublimation technology
- edge finish adapted to mast type
 - with or without arm

▣ STANDARD FINISH

- top: tunnel for masts with arm or double-stitch trim for masts without arm
- bottom and right side: double-stitch trim
- left side: flag band + carabiners
- other finishing methods are available as per customer's order

! MERITS

Tunnel

Edge finished with double-stitch trim

Edge with carabiners reinforced by flag band

PVC carabiners

▶ POP-UP BANNERS

- available in three sizes
- printout on knitted polyester material trimmed with band and pulled over the metal structure
- two-sided advertising systems
- for indoor and outdoor exposition
- bag (included) to facilitate transport
- easy to install – unfolds immediately when taken out from bag; all one needs to do is connect the two sides with Velcro strap and fix to substrate with pins

+ SPECIFICATION

Type	System dimensions W x H [cm]	Dimension packed [cm]	Weight [kg]

FROM BAG

▶ PRINTS FOR COFFER FRAMES

DECORS

- polyester material with basis weight of 210 or 220 g/m² and limited translucency
- printouts of virtually any length and maximum width of 310 cm can be made
- printing with the use of direct dye-sublimation technology
- printout trimmed with PVC Keder 14 x 3 mm (or other as per order)
- intended for one-sided coffer frames
- decors adapted to coffer frames of various structures

BLOCKOUT

- maximum width of artwork in single gore: 300 cm
- material: polyester with non-flammability certificate
- black-coloured reverse side of the material to block light
- printing with the use of direct dye-sublimation technology
- printout trimmed with PVC Keder 14 x 3 mm (or other as per order)
- intended for one- and two-sided coffer frames
- used frequently as a trade fair stand component

BACKLIGHTS

- backlighting-dedicated fabric with basis weight of 310 g/m²
- printing with the use of direct dye-sublimation technology
- printout trimmed with PVC Keder 14 x 3 mm (or other as per order)

! MERITS

PVC Keder to facilitate installation

A sewn-in loop facilitates artwork replacement

Packed printout saves space

▶ COFFER FRAMES

! SELECTED PROPERTIES OF COFFER FRAMES

- made of 125 mm aluminium section
- one- or two-sided
- self-standing (with stabilising feet) and suspended
- with (LED lamps) and without backlighting

125 mm aluminium section

Stabilising feet

LED lighting

STRAIGHT TEXTILE WALL

- available in two sizes
- printout on textile material with basis weight of 175 g/m² with the use of direct dye-sublimation technology
- elastic material thanks to which the artwork perfectly follows the wall shape
- frame structure made of aluminium tubes with diameter 30 mm
- two-sided artwork as an option
- printout easy to install on frame structure by pulling the fabric over and zipping up
- quick "click" frame assembling system
- two metal feet provided to stabilise the structure
- bag included

SPECIFICATION

Type	System dimensions W x H x D [cm]	Artwork dimensions W x H [cm]	Weight [kg]
Straight 3 x 3	250 x 230 x 3/40*	241 x 216	11
Straight 3 x 4	300 x 230 x 3/40*	290 x 216	12

* 40 cm – foot length

MERITS

Metal feet provided to stabilise the structure

Zip fastener to facilitate printout installation

Frame assembled by means of "click" system

BAG
INCLUDED

ARCHED TEXTILE WALL

- available in two sizes
- printout on textile material with basis weight of 175 g/m² with the use of direct dye-sublimation technology
- elastic material thanks to which the artwork perfectly follows the wall shape
- one- or two-sided printing
- printout easy to install on frame structure by pulling the fabric over and zipping up
- quick "click" frame assembling system
- aluminium structure
- bag included

SPECIFICATION

Type	System dimensions W x H x D [cm]	Artwork dimensions W x H [cm]	Weight [kg]
Arched 3 x 3	250 x 230 x 35	248 x 223	9
Arched 3 x 4	305 x 230 x 35	308 x 220	10

Wall depth
– 35 cm

▶ TEXTILE WALL TYPE C

- available in size 300 x 230 x 50 cm
- polyester material with basis weight of 175 g/m²
- direct dye-sublimation printing technology
- two-sided printing possible
- elastic material thanks to which the artwork perfectly follows the wall shape
- printout easy to install on frame structure by pulling the fabric over and zipping up
- lightweight yet very robust structure
- easy-to-assemble frame – “click” system
- eye-catching shape
- two metal feet provided to stabilise the structure
- bag included

⊕ SPECIFICATION

Type	System dimensions W x H x D [cm]	Artwork dimensions W x H [cm]	Weight [kg]
Type C	300 x 230 x 50	288 x 230	15

! MERITS

Metal feet provided to stabilise the structure

Zip fastener to facilitate printout installation

Frame assembled with the use of “click” system

▶ HOP-UP WALL

- available in three sizes
- elastic creaseproof material
- direct dye-sublimation printing technology
- artwork fixed to frame with Velcro fasteners
- relatively light frame structure of anodised aluminium
- structure foldable together with fabric
- wheeled textile transport bag included

⊕ SPECIFICATION

Type	System dimensions W x H x D [cm]	Artwork dimensions W x H [cm]	Weight [kg]
Straight Hop-up 3 x 2	152,5 x 226 x 29,5	222 x 226	11
Straight Hop-up 3 x 3	226 x 226 x 29,5	296 x 226	14
Straight Hop-up 3 x 4	299,5 x 226 x 29,5	369 x 226	16

Fixed with Velcro fasteners

Frame foldable together with printout

▶ TEXTILE BANNERS

- available in virtually any size and dimensions
- printouts on polyester material of flag or banner type
- printed with the use of direct dye-sublimation technology
- various finish options available:
 - cut to format
 - edges reinforced with polyester band + eyelets
 - tunnel
 - trimmed edge
 - trim + string and loops in corners
- depending on finish type, banners may be used in different applications, e.g. as a pitch-board flag
- used typically in settings of mass events

THE OFFER
DOES NOT
INCLUDE
FRAMING

F FINISH OPTIONS

Edges reinforced with polyester band + eyelets

Tunnel

Cut to format

▶ NON WOVEN FABRIC BANNERS

- heights: 76 cm, 90 cm, 100 cm
- non woven fabric 130 g/m²
- lightweight reinforced fabric
- direct dye-sublimation printing technology
- cutting to format and eyelets each 50 cm in standard
- very lightweight – many meters long printed rolls can be made to order
- to be used e.g. as an excellent element of mass event settings / advertising pitch sideboards

! MERITS

Lightweight reinforced fabric

Cutting to format and providing eyelets in standard

MANY METER
LONG PRINTOUTS
AVAILABLE
TO ORDER

▶ BARRIER COVERS

- dimensions adapted to barrier dimensions
- printed on fabrics with basis weight of 210 or 220 g/m²
- printing with the use of direct dye-sublimation technology
- easy to install – fixed with Velcro straps
- two different artworks printed on both sides as an option
- to be used during mass events

▶ PALLET COVERS

- dimensions adapted to EUR-pallet size (120 x 80 cm), height corresponding to the height of 1 to 5 pallets
- printed on polyester fabrics
- printing with the use of direct dye-sublimation technology
- very lightweight, easy to install
- a simple way to obtain additional space for advertising material or exposition of goods

! MERITS

Velcro straps make installing fast and easy

Lower edge reinforced with double seam

EASY TO INSTALL
– FIXED WITH
VELCRO STRAPS

▶ COVERS FOR ANTI-THEFT GATES

- printout on decor-type polyester material
- easy to install
- resistant to mechanical damage
- dimensions and shapes as per individual customer's order
- very effective form of advertising – directly at shop entrance

▶ INDOOR BANNERS

- available in different sizes
- rolled up, lightweight, easy to transport
- high-quality printouts on a wide range of materials
- typical finishing methods:
 - top, bottom: tunnels + two round stiffening battens
 - string to suspend the banner
 - sides: double stitching
- the battens eliminate flapping in moderate puffs of wind indoors

FINISH

Banner top

Banner bottom

Double stitch

▶ STAGE AND EVENT ARRANGEMENTS

- it is possible to fabricate very large printed arrangements by means of joining many gores, e.g. stage and trade fair decors, sports stadium flags, theatrical and television sets, and artwork arrangements for mass events
- printed with the use of direct sublimation or UV process (single gore width of up to 3.2 m and 5 m, respectively)
- printing on many different materials is possible
- finishing method – as per customer's individual order

MEGA-PRINTOUTS
AVAILABLE
TO ORDER

▶ BANER FRONTLIT

- available in any size and different finish options
- maximum width of artwork in single gore 500 cm
- weldable material allows to produce large-area advertising surfaces
- available with basis weight of 450 g/m² and 510 g/m²
- allows to obtain high-quality UV printouts
- dedicated for short- and medium-lived applications
- typical finishing methods:
 - cut to format
 - welded on perimeter + eyelets spaced 50 cm apart
 - welded tunnel
 - sewn-on Keder with round core
 - with sewn-in Velcro straps
- other finish options available as per customer's order

▣ TYPICAL FINISHING OPTIONS

Weld + eyelets

Keder with round core

Sewn-in Velcro straps

Welded tunnel

OTHER FINISHING
METHODS
ARE AVAILABLE AS
PER CUSTOMER'S
ORDER

▶ BACKLIGHT BANNER

- a coated matt-finished material characterised with excellent light diffusion and transmission properties
- two-sided UV printing process (with vertical mirror image on reverse side)
- maximum width of artwork in single gore 495 cm
- the printout looks the same during the daytime (without backlighting) as at night-time ("day/night" feature)
- material very resistant to tear and wear, moisture, UV radiation, and both low and high temperatures
- intended mainly for framing
- typical finishing methods:
 - cut to format
 - welded tunnel
 - sewn-on Keder with round core

EXCELLENT
FOR BACKLIT
ADS

▣ TYPICAL FINISHING OPTIONS

Cut to format

Keder with round core

Welded tunnel

▶ BLOCKOUT BANNER

- available in different sizes and finish options
- weldable material allows to obtain large advertising surfaces; maximum width of artwork in single gore 320 cm
- a coated material with an interlayer preventing the artwork from being seen from reverse side
- thanks to inner separator, banners do not show through even on sunny days and are perfectly readable
- particularly suitable for two-sided printing
- allows to obtain high-quality printouts characterised with high resistance to tearing and fraying
- can be used both indoors and outdoors
- typical finishing methods:
 - cut to format
 - weld along perimeter + an eyelet each 50 cm
 - welded tunnel
 - sewn-on Keder with round core

▣ TYPICAL FINISHING OPTIONS

Cut to format

Welded edge + eyelets

Welded tunnel

Sewn-on Keder

DIFFERENT
ARTWORK ON EACH
OF BANNER SIDES

▶ MESH FABRIC

- available in any format
- the maximum gore width is 500 cm
- material: mesh-structured PVC fabric of durable fibres
- available in standard (280 g/m²) and premium (340 g/m²) versions
- much lighter than frontlit or backlit type textiles
- enables free flow-through of air and light
- perfect as a carrier for large ads installed on building façades
- typical finishing methods:
 - cut to format
 - weld on perimeter + eyelets spaced 50 cm apart
 - welded tunnel
 - sewn-on Keder with round core

▣ TYPICAL FINISHING OPTIONS

Welded edge + eyelets

Welded tunnel

Keder with round core

INSTALLED
TYPICALLY
ON BUILDINGS

▶ TEXTILES FOR BACKLIT APPLICATIONS

- available in different sizes
- maximum width of artwork in single gore 318 cm
- materials with basis weight of 195 g/m²
- UV printing process
- a guarantee of high-quality artwork printouts
- impermeable for air and water
- excellent light transmission and diffusion properties
- used mainly in backlit ad carriers of coffer frame or lightbox type
- can be used also for non-backlit ads
- used both indoors and outdoors
- easy-to-install materials
- finish: sewn-on 14 mm x 3 mm PVC Keder (or other as per order)

! MERITS

PVC Keder makes installation of the printout easy

A sewn-in loop facilitates makes replacement easier

Good light diffusion properties

▶ TEXTILES FOR UV PRINTING

- available in different sizes
- materials: 100% polyester
- fire- and water-proof
- one-sided UV printing process
- light-diffusing inextensible materials
- used mainly for fair stands, also in blackout version

F FINISH

- cut to format
- welded tunnel
- sewn-on Keder

UV PRINTOUTS ON
UP TO 5 M WIDE
SINGLE GORE

Cut to format

Sewn-on PVC Keder

Welded tunnel

▶ ROLL-UP

- available in three sizes
- UV printing process on material with basis weight of 240 g/m²
- fast and easy to install
- aluminium structure
- bag included

✚ SPECIFICATION

Type	System dimensions W x H x D [cm]	Artwork dimensions W x H [cm]	Weight [kg]

WITH PRINTOUT

COVER
INCLUDED

▶ TWO-SIDED A-BOARD

- made of 3 mm thick HIPS boards
- UV printing process
- simple structure easy to assemble
- dimensions : 46 x 99 cm
- weight 3.5 kg

▶ PALLET WRAPPING

- printout size adapted to pallet dimension
- made of fluted propylene, foamed PVC, PALBOARD, or banner
- UV printing process
- simple, lightweight, four-element board or single-element banner structure
- fixed with the use of Velcro straps or Viking screws
- improves exposition of merchandise sold directly from pallets
- is an additional – and inexpensive – advertisement carrier

! MERITS

PVC boards, polypropylene sheet, PALBOARD

Polypropylene – fixed with Velcro straps

Bend and twisted PVC

Viking screws

▶ WALLPAPER

- many format available to order
- material: specifically coated Fleece with smooth structure and basis weight of 210 g/m²
- large artwork divided into gores with maximum gore width of 104 cm
- excellent product, used both as decorative and ad-carrying material
- high quality UV printing process – vivid durable colours
- easy to put up with the use of wallpaper glue
- resistant to damage and soiling
- health-friendly
- standard finish: cut to format without laps

▶ PVC FLOORING

- material: polyester coated with foamed PVC, with thickness of 2.2 mm and basis weight of 1000 g/m²
- maximum width of artwork in single gore – 313 cm
- UV printing process
- soft and soundproof flooring is perfect as an ad carrier or decorative element of interior
- anti-skid certified product
- resistant to stretching, tearing, and creasing

Delivered in rolls

Cut to shape as per order

2.2 mm thick flooring

▶ UV BACKLIT FILM

- material: specifically coated 180 micron thick polyester film
- available in three widths: 106.7 cm, 127 cm, and 152.4 cm
- UV printing process in double strike mode
- photo-quality printouts with extraordinary colour depth
- used mainly for indoor backlit ads
- finish:
 - cut to format

▶ SELF-ADHESIVE FILMS

- ads of virtually any dimensions and shapes can be made to order
- perfectly adapt to curved surfaces of different types
- UV printing process
- depending on film type, printouts are intended for short-, medium-, and long-living indoor and outdoor applications
- perfectly suitable for sticking on shop windows, trade fair stands, exposition walls and advertising boards, as well as vehicles

■ FINISH

- cut to format
- cut to shape
- nicked to shape

▶ POSTERS

- matt material with basis weight of 150 g/m²
- available roll widths: 110 cm and 137 cm
- UV printing process
- depending on application, two printing modes are offered: standard and for backlit materials (double strike)
- posters of any height can be printed
- standard finish:
 - cut to format

▶ PICTURES ON CANVAS

- material: matte canvas with basis weight of 450 g/m²
- fraying-free material with natural canvas texture
- high-quality UV printing process
- printout stretched on wooden frame as a standard option
- makes possible to create a highly individualised interior by exposing one's own photos and graphic art or reproductions
- an original and unique gift idea
- standard finish options:
 - material cut to size
 - cut to size and stretched on wooden frame

▶ SHOULDER BAG

- made of two layers of Tyvek material
- very light, strong, and durable
- waterproof
- UV printing process
- recyclable
- dimensions 45 x 42.5 cm
- other materials and different sizes available (as per customer's order)

▶ FLOOR STICKERS

- available in any size
- material: laminated monomer self-adhesive film
- durable material – resistant to mechanical damage and aggressive detergents
- UV printing process
- high quality printouts – vivid colours
- for indoor and outdoor applications
- very good adhesion to smooth surfaces
- any shape can be cut to order
- printout edges protected with laminate

▶ FOAMED PVC

- available in different formats and thickness
- as a standard, we use 3 mm and 5 mm thick boards
- the maximum board size is 203 cm x 305 cm
- artworks exceeding the board format are divided into gores
- material: rigid polyvinyl chloride boards, white or coloured
- board surface is matt as a standard
- the material has a regular internal structure of closed cells and a smooth and hard surface
- UV printing process
- enables high degree of colour reproduction
- material resistant to water and chemical agents, flash-resistant, soundproof
- wide range of applications in large-format advertising

▮ FINISH

- cutting / milling to format or shape
- bending

⚡ MERITS

Milled board

Thermally bent

Two-sided print

BOARDS ARE
CUT OR MILLED

▶ TRANSPARENT BOARDS

- available in different formats and thickness
- 2 mm thick boards in 205 cm x 305 cm format are a standard
- one of the materials most frequently used in advertising business
- resistant to harsh weather conditions and UV radiation
- characterised with good transparency and high rigidity
- UV printing process
- as an option, printing of mirror image on reverse side is possible in two or three layers with the use of white ink
- wide range of wide-format advertising applications

⚡ MERITS

Milled board

Thermally bent board

Printed with the use of white
ink

DIBOND COMPOSITE BOARDS

- standard formats: 305 x 150 cm, 405 x 150 cm, or 405 x 200 cm
- board thickness: 2 mm and 3 mm
- aluminium facing thickness: 0.2 mm or 0.3 mm
- material: rigid and aesthetic composite boards made of varnished aluminium layers bonded with low-density polyethylene (LD-PE) core
- UV printing process
- versatile material for various applications
- the most durable and weather-resistant flat material
- resistant to delamination
- depending on manufacturer, available in different shades of white and other colours

**HIGH RESISTANCE
TO WEATHER
CONDITIONS**

FINISH

- milled to format or shape
- angled milling

MERITS

Milling to any required shape

Angled milling

Optional bending after angled milling

FLUTED POLYPROPYLENE BOARDS

- available in sizes up to 300 cm x 200 cm
- boards with thickness of 3 mm and 5 mm are a standard
- lightweight material, an alternative to cardboard
- UV printing process
- easy to machine
- waterproof, resistant to mechanical damage
- resistant to variable weather conditions
- wide range of applications in large-format advertising
- eyelets (3 mm) as an option

**LIGHTWEIGHT
YET RELATIVELY
DURABLE
MATERIAL**

MERITS
